Price: **19.95**

**Product Information**

This Go-Video **DDV3110** Dual-Deck VCR is more than twice as good as the ordinary VCRs.

The Go-Video technology allows you to make copies of home videos at the touch of one button, with better quality and much more convenience than hooking together two separate VCRs. You'll have twice the recording and playback capability. You can even watch one tape while recording in the other deck. Or rewind two tapes at once.

## Features

- **Easy Editing**

The Go-Video Dual VCR allows you to add voice explanations or funny lines, add on-screen written titles, and/or change the order of up to 8 scenes at a time automatically. Now you can easily edit your own custom home movies.

- **Twice the Playback or Recording Time**

In Loop mode, your Go-Video Dual Deck will keep playing-from Deck 1 to Deck 2 back to Deck 1-indefinitely. Or choose Sequence to record (or play) from Deck 1 through to Deck 2.

- **Commercial Free Copying**

If you like to record TV shows, you can record all your favorite shows and make commercial-free copies of them for viewing or archiving. Save about twenty minutes out of every sixty minutes - the average ratio of commercial time to regular TV programming - by using this newest Dual-Deck feature. It's easy. Just place a blank tape in each VCR. Select the automatic Commercial Free copy feature from the menu. Use the Timer Record function to choose and tape your favorite TV shows. Watch the tape that results in Deck 2, ready for you when you get home.

- **Timer Record**

Lets you set up to 16 timer events up to one year in advance - twice as many as most VCRs.

- **Complete Program Record (CPR)**

Senses the end of a tape and switches to SLP to make sure your tape doesn't run out when you're recording.

- **Auto Setup**

Automatically sets the clock and searches for channels when you plug it in.

- **Child Lock**

Completely disables the front panel controls. (Then you hide the remote.)

- **Auto Head Cleaner**

On both decks. Keeps copies looking sharp.

- **Hi-Fi Playback and Recording**

Even copies sound great.

- **Auto Power**

On/Off, Auto Eject.

- **Sequential Recording**

12-hour, from deck to deck.
